

CROPS SCHEDULE & WORKFLOW CHECKLIST

1. Harvest the Crops Before Withering Begins
 - a. If the field is being used for the next or same rotation, proceed forward with the workflow. Otherwise, the field can remain dormant until the next need of use.
 2. Cultivate the Field
 3. Check with the pH Values of the Soil
 - a. If warranted, apply the auto-balanced lime treatment based on what that field will need.
 4. Check with the Nitrogen Percentage Values for the Soil
 - a. Use the information given, apply the first base of auto-balanced fertilizer for what the field needed.
 5. Plant the Same or New Seed
 - a. While planting, apply the second base of the auto-balanced fertilizer to bring the field fertilization to 100%.
 6. Weed the Entire Field Immediately After Planting
 - a. SimWorld Farms wants to AVOID using herbicide at all cost and would rather use the weed rake instead.
- Gameplay Setup: No Seasons, 5 Days per Month with Real-Time, Not Following On-Screen Calendar, Precision Farming DLC
- For a list of mods used on SimWorld Farms – visit <http://www.TheSimWorld.com/gamemods.html> or !GameMods in chat.

First to Last Planting Dates & Field Assignments

CROP TYPE	FIELD ASSIGNMENT	SEASONAL PLANTING DATES
Canola	1	August 20 th to November 25 th
Wheat	5 / 3	February 3 rd to June 11 th
		September 5 th to November 25 th
Sunflowers	1	March 3 rd to August 1 st
Oats	4	February 20 th to August 1 st
Barley	3 / 5	February 3 rd to June 11 th
		September 10 th to November 25 th
Corn	6 & 7	March 25 th to August 1 st – Field 6 to September 30 th – Field 7
Soybeans	3	May 15 th to August 31 st
Sorghum	5	May 15 th to August 31 st
Sugar Cane	4 & 6	August 16 th to November 25 th
Olives	2 & 8	March 10 th to November 25 th
Potatoes	7	October 4 th to December 28 th

- All field crops must be harvested by December 3rd with the exception of the potatoes as these must be harvested by December 31st. From December to February going forward, this is a time to bring all machinery in for tune-ups, paint jobs, selling or acquiring new machinery. Additionally, this is a time where we look at our land, our yield output from the past year. Make payments to the bank as necessary, and acquire new fields and change crop assignments for the next year.
